PRODUCT SUMMARY

The HL9401 is a 180° signal splitter and combiner that offers industry-best amplitude and phase match over a bandwidth of 100 MHz to 20 GHz.

It is suitable for use in 40 Gbps communications systems, high-speed analog-to-digital conversion, frequency response testing for differential devices, and many other applications.

DEPLOYMENT NOTES

All specifications contained herein are typical unless otherwise noted.

When the device is used as a signal combiner using differential signals with unmatched source impedance, attenuators (3-6 dB) may be required to improve isolation.

If the DC voltage of the input or output is not zero, DC blocks are required.

S-PARAMETERS

S-parameters for both single-ended and mixed-mode are available on our website.

HL9401 Single-ended Insertion Loss and Return Loss

Bandwidth for all HYPERLABS baluns is defined as the range of frequencies where insertion loss is within 3 dB of the nominal level (6 dB) in single-ended mode.

Figure 1 shows the insertion loss and amplitude match of an HL9401 in single-ended mode.

Figure 2 shows the return loss of all ports in single-ended mode.

HL9401 Mixed-mode Insertion Loss

Mixed-mode Sparameters are useful for characterizing the performance of differential circuits such as broadband baluns.

Figures 3-4 show the insertion loss of an HL9401 balun in mixed mode to 20 GHz.

HL9401 Mixed-mode Return Loss

Figure 5 shows the typical mixed-mode return loss of the unbalanced and balanced ports of an HL9401 to 20 GHz.

HL9401 Common-mode Rejection Ratio

Figure 8 shows the typical common-mode rejection ratio (CMRR) of an HL9401.

HL9401 Group Delay and Phase Match

Figure 6 shows the typical group delay of an HL9401 used as a signal splitter. The average slope of the phase mismatch, shown in *Figure 7*, is equal to the group delay mismatch.

HL9401 Eye Diagrams

The eye diagrams in *Figures 9-11* show a PRBS31 pattern at 28 Gpbs. The input signal has amplitude of 372 mV and is shown at 100 mV/div. The inverting and non-inverting outputs are shown at 51 mV/div.
